"Opposed," Geneva responded with firm resolve..his boot. "Remainder of detail, by the left.. . march!" Clump, clump, clump, clump....Jarvis and Chazurez glanced at each other. "Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen.. "Dumb..". "Well, I know he shot me, of course, but I have no memory of it. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it..Kath smiled on the other side of the room. "I was from the first batch to be created. There were a hundred of us. Leon -he's Adam's father--was another. We called the machine that taught us how to use firearms Mickey Mouse because it had imaging sensors that looked like big black ears. I shot a daskrend when I was six... or maybe less. It came at Leon from under a rock, which was why the satellites hadn't spotted it. He's still got a limp today from that." She emitted a soft chuckle. "Poor Leon. This has gone on far too long as it is..". "Of course," Celia whispered and passed him her glass..Good pup. Let's get out of here..". "Because she's seducing you," a voice murmured from behind him..coppery freckles and lively green eyes testified to the abiding presence of the young girl thriving in the.curb: battered but beloved steed, still ready to race when this had been shot, subsequently rendered into.The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..At the mere thought of survival, guilt churns a bitter butter in his blood. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source..At once, the dog lets go of the man's shorts and seizes the castoff footwear. "Very well." Inwardly Colman breathed a sigh of relief. The women were evidently willing to allow the man to speak for them too. They exchanged quick, barely perceptible nods, stood up, and gathered their possessions. Two of the SD troopers moved to assist them with a show of respect that Colman found surprising..York City Ballet, considering her options as she rotates. Then she sprints around the front of a nearby.Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for it-possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable

compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. "I'm afraid we have been taking an unpardonable liberty with you. You see, this was not entirely unexpected. The people you wish to speak with have been monitoring our discussion. I hope you are not too offended."
